THERM-A-GUARD INSTALLATION INSTRUCTIONS

All Guard Installations

Trim top lead outlet rings to necessary size

Side-Exit Lead Installations

Separate hinged halves by gently twisting the two halves apart at the hinge

Trim hinge area for side-exit leads; one of the three hinges can be completely removed while still allowing proper function (Note: Remove area between hinges on Model #TGB-50007)

Bend latch inward to insure a tight snap over latch fingers

Re-snap hinges together and install guard around bushing skirt or bushing cap

Trim bottom fingers to insure snug, but not overly tight, fit around bushing skirt or bushing cap

Please call (888) 388-4348 if you have any questions, comments and/or concerns
